

SHIVAM KUMAR

☎ +91-6207722859 ✉ shivamkumardlnn@gmail.com  [Linkedin](#)  [Github](#) </> [Problem Solving](#)

SUMMARY

Software Engineer with a solid foundation in Data Structures and Algorithms, and hands-on experience in Machine Learning and AI. Skilled in building real-world, ML-powered applications using Python and modern libraries. Passionate about solving problems through efficient and maintainable code.

EDUCATION

National Institute of Technology, Andhra Pradesh

2022 – 2026

B.Tech - Electrical and Electronics Engineering - CGPA - 7.29

Tadepalligudem, Andhra Pradesh

EXPERIENCE

Swecha Telangana

May 2025 – Aug 2025

Role - AI Developer Intern

Hyderabad, Telangana

- Contributing to Swecha Voice— a Telugu voice-enabled dialogue system aimed at bridging the digital divide through dialect-aware AI models.
- Fine-tuning LLMs and speech models to incorporate regional dialects of Telugu, enhancing inclusivity in voice-based systems.
- Collaborating with teams to build and test end-to-end AI pipelines using Python and open-source tools.
- Supporting the mission of Free Software by developing open and community-driven voice technologies for underrepresented communities.

SKILLS

Programming Languages: Python, C++, MySQL

Machine Learning & AI: scikit-learn, pandas, NumPy, matplotlib, seaborn, TensorFlow, Keras, Model Evaluation

Web Development: HTML, CSS, JavaScript

Software Development Tools: Git, GitHub, VS Code, PyCharm, Arduino

Soft Skills: Communication, Teamwork, Leadership, Project Management, Critical Thinking

PROJECTS

AI-Powered Fake News Detector

Python, MobileBERT, Hugging Face Transformers, JavaScript, React, Render,
Browser Extension

Aug 2025

- Built a fake news detection app using MobileBERT with Hugging Face, featuring full-stack development.
- Deployed on Render with real-time inference and a browser plugin for seamless news verification.
- Optimized MobileBERT for faster, accurate predictions compared to BERT/DistilBERT.

Battery SOH and Remaining Life Estimation

Python, Pandas, Numpy, Scikit-learn, LSTM, Jupyter Notebook, TensorFlow, Git

Apr 2025

- Designed and implemented a robust machine learning pipeline to estimate battery State of Health (SOH) and predict its remaining useful life (RUL) using time-series sensor data, leveraging LSTM networks and Scikit-learn for accurate forecasting.

Eyeball-Controlled-Wheelchair

Python, OpenCV, RaspberryPi, CameraModule, MotorDriver, DCMotor, Battery.

march 2025

- Designed a wheel chair system controlled by eye movement via computervision.
- Implemented real-time face and pupil tracking using OpenCV to translate eye gestures into directional motor commands for navigation.

CERTIFICATIONS AND ACHIEVEMENTS

- Natural Language Processing Applications — issued by: NVIDIA
- Fundamentals of Deep Learning — issued by: NVIDIA
- SIH 2024 Internal Hackathon and MATLAB SIMULINK Hands-on Workshop — issued by: NIT ANP
