EDUCATION

National Institute of Technology, Andhra Pradesh

Bachelor of Technology in Electrical and Electronics Engineering, GPA: 7.29/10.0

Tadepalligudem, India

Aug 2022 – May 2026

EXPERIENCE

AI Developer Intern

May 2025 – Aug 2025

Swecha Telangana (Collaboration: IIIT Hyderabad, Meta, TASK, HYSEA)

Hyderabad, India

- Contributed to one of the world's largest AI internship programs, collaborating with 500+ developers on open-source AI projects
- Collected, preprocessed, and engineered features from local datasets to fine-tune custom AI models for domain-specific tasks
- Developed and deployed production-ready AI applications using Python, implementing end-to-end ML pipelines from model training to deployment
- Utilized DevOps tools and collaborative development practices to maintain code quality and streamline deployment workflows
- Demonstrated strong problem-solving and teamwork skills in a fast-paced, open-source development environment

PROJECTS

AI-Powered Fake News Detector | MobileBERT, FastAPI, Vite, PyTorch, NLP | 🌐 | 🔄

2025

- Achieved Top 10 ranking in Inspira Hackathon by building end-to-end misinformation detection system using fine-tuned MobileBERT transformer
- Developed full-stack solution with FastAPI backend and Vite frontend, achieving 90% accuracy on binary news classification tasks
- Engineered Chrome extension integrating Google Gemini API to automatically detect and rewrite fake news with factual corrections

Eyeball-Controlled Automatic Wheelchair | Raspberry Pi, OpenCV, Python, Computer Vision | 🔄

2024

- Designed assistive technology solution using real-time eye-tracking algorithms with OpenCV for wheelchair control
- Achieved 90% accuracy in gaze direction detection through custom computer vision models and image processing techniques
- Integrated Raspberry Pi hardware with Python control systems to enable hands-free navigation for mobility-impaired users

Shivam Fast Food Delivery Platform | React, Node.js, Express, MongoDB, Vercel | 🌐 | 🔄

2025

- Built full-stack food delivery web application with React frontend and Node.js/Express backend serving 100+ menu items
- Developed RESTful APIs for user authentication, cart management, and order processing with MongoDB database integration
- Deployed production-ready application on Vercel with responsive design ensuring seamless cross-device experience

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, HTML, CSS, JavaScript

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Flask, OpenCV, NumPy, Pandas, Matplotlib

Developer Tools: Git, GitHub, Docker, Linux, Raspberry Pi, VS Code, Jupyter Notebook

Core Competencies: Machine Learning, Deep Learning, NLP, Computer Vision, Data Structures & Algorithms, Database Management Systems, DevOps, Software Development

CERTIFICATIONS & ACHIEVEMENTS

NVIDIA Deep Learning Institute: Fundamentals of Deep Learning & Getting Started with NLP using Transformers

Code For Bharat Season 2: Selected participant in national-level open-source contribution program

Competitive Programming: Solved 700+ problems across </> LeetCode and GeeksforGeeks, focusing on DSA optimization

Research & Development: Engaged in academic research projects applying ML/AI to electrical engineering problems
